Discussant: Warren Boeker, University of Washington

- Cognition and Consolidation: Saturation Dependence in Cognitive Market Networks
[Mark Kennedy, University of Southern California](#)
- Effects of Search Timing on Product Innovation: The Value of Not Being in Sync
[Riitta Katila and Eric Chen, Stanford University](#)

Session 5 4:45 – 5:30 pm Organizing Collaborative Innovation

Discussant: Nandini Rajagopalan, University of Southern California

- Rotating Leadership and Symbiotic Relationships: Divided Governance in the Context of Collaborative Innovation
[Jason Davis, Massachusetts Institute of Technology](#)

6:15 – 9:30 pm Dinner Cruise on Lake Washington and Lake Union

Saturday, September 8 BOA Executive Education Center 310

Session 6 8:15 - 9:45 am Duality of Technology Spillovers

Discussant: Jason Davis, Massachusetts Institute of Technology

- Learning from What Others Have Learned From You: The Effects of Knowledge Spillovers on Originating Firms
Hongyan Yang, Kevin Steensma and Corey Phelps, University of Washington
- Reputations for Toughness: The Effects of Patent Enforcement on Knowledge Spillovers via Inventor Mobility
Rajshree Agarwal and Martin Ganco, University of Illinois; Rosemarie Ziedonis, University of Michigan

Session 7 10:15 -11:45 am Corporate Venture Capital

Discussant: Ben Hallen, University of Maryland

- Do Inter-Firm Ties Reinforce or Substitute for Each Other? A Study of Alliances and Corporate Venture Capital in the Software Industry
Gary Dushnitsky, University of Pennsylvania; Dovev Lavie, University of Texas
- External Venturing for Strategic Renewal: Towards Understanding Who Makes Corporate Capital Investments and Why
Sandip Basu, Corey Phelps and Suresh Kotha, University of Washington

11:45 – 1:15 pm Lunch in the Douglas Forum

Session 8 1:15 – 2:45 pm Dissecting the Sources of Technological Innovation

Discussant: Andrew Nelson, Stanford University

- Professional Users as a Source of Innovation: The Role of Physician Innovation in the Medical Device Industry
Aaron Chatterji, Duke University; Kira Fabrizio, Emory University
- Decoding Disruption
Ashish Sood, Emory University; Gerard Tellis, University of Southern California

Session 9 3:15 – 5:15 pm External Sources for Innovation

Discussant: Lourdes Sosa, London Business School

- Licensing University Inventions to Start-ups and Established Firms
Brent Goldfarb and Rachelle Sampson, University of Maryland; Arvids Ziedonis, University of Michigan
- Explaining Innovation Performance: Is Corporate Venture Capital a Complement for Other External Technology Sourcing Modes
Vareska van de Vrande, RSM Erasmus University; Wim Vanhaverbeke and Geert Duysters, Eindhoven University of Technology; Nadine Roijakkers, Atos Consulting

University of Michigan

Rosemarie Ziedonis
University of Michigan

Center for Innovation and Entrepreneurship

ENTREPRENEURSHIP is a dynamic union of innovation and opportunity, passion and vision, risk and reward. The Center for Innovation and Entrepreneurship was created in 1991 to inspire entrepreneurial thinking and provide the resources that enable University of Washington students and faculty to bring their entrepreneurial ambitions to life.

The Center's mission is to promote learning and discovery in innovation and entrepreneurship to students—from undergraduates to Ph.D. candidates—across the University of Washington campus. The Center recognizes that entrepreneurs come from all disciplines and fields of study, and the mandate of CIE is to provide the education, networks, real-world experiences, and connections that make it possible for students at the University of Washington to achieve their entrepreneurial goals, either within start-up companies or as agents of innovation and change within established firms.
