University of Oregon

UO Lundquist Center for Entrepreneurship (LCE)

In August 2010, *Entrepreneur Magazine* dubbed Eugene, Oregon the nation's top "Green Scene – Where Capitalism meets Eco-Consciousness." LCE was endowed in 1989 by Charles H. Lundquist with this very synthesis in mind. The center provides students with learning and experiential opportunities that enable them to succeed as innovative, responsible, and effective business leaders. It is committed, in both concept and action, to adding value by creating, sharing, and promoting business knowledge through cooperation and collaboration among students, faculty, and the greater business community. To this end, LCE has continued to build on its traditional base of activity, expanding efforts that lead to greater cooperation and support for entrepreneurial activities through partnerships across the Oregon University System. Through these efforts, the center strives for a leadership position in economic and knowledge development activities throughout the Pacific Northwest.
