About the Buerk Center for Entrepreneurship, University of Washington

Entrepreneurship is the dynamic union of innovation and opportunity, passion and vision, risk and reward. The Buerk Center for Entrepreneurship was created in 1991 to inspire entrepreneurial thinking and provide the resources that enable University of Washington students and faculty to bring their entrepreneurial ambitions to life.

The Buerk Center recognizes that entrepreneurs come from all fields of study. We promote interdisciplinary collaboration throughout the University, resulting in partnerships between students and faculty in everything from bioengineering to law, marketing to computer science.

The Buerk Center also connects students with experts in Seattle's thriving entrepreneurial community through its advisory board, competitions, and networking events. Students benefit from the mentorship and real-life experiences facilitated by experts in venture investing, product development, cleantech, and more.
