Indiana University

About the Technology Commercialization Centre

Alberta School of Business, University of Alberta

The Technology Commercialization Centre (TCC) supports scholarship, education and outreach in entrepreneurship and innovation at University of Alberta and across the Province of Alberta. The scholarly excellence of our Alberta School of Business faculty in entrepreneurship and innovation provides the core foundation for all our initiatives. Building on our world recognized leadership in scholarship at the interface of entrepreneurship and organization theory, TCC's Entrepreneurship@UAlberta is a centrally supported cross-faculty University of Alberta initiative led by the Alberta School of Business that aims to catalyze and sustain an interdisciplinary, cross-faculty culture of innovation and entrepreneurship. This is achieved through curricular and co-curricular student development at all levels by combining good business fundamentals, with a rich, mentored learning environment and strong partnership networks. This is bolstered by eHUB, our networking/incubating space for nascent entrepreneurial enterprises powered by students from across the University.
